

TASKI swift 35

Sheet Subtitle Dry foam carpet cleaning machine

TASKI swift 35 brings you:

- Innovative dry foam system
- Minimum down time
- Reduced need for spray-extraction cleaning
- Increased productivity

Increased productivity

Compared to the bonnet cleaning method the TASKI swift 35 is more than twice as productive. The machine is easy and comfortable to operate, even after prolonged use.

Innovative dry foam system

The TASKI swift 35 is an intermediate carpet cleaning machine. It utilises the unique dry foam generator which produces foam with only 2-10% humidity.

Minimum down time

As a result of the low humidity, revitalised areas can be opened to traffic shortly after intermediate dry foam cleaning.

Reduced need for spray-extraction cleaning

The dry foam cleaning method maintains the high aesthetic characteristics of carpets and increases their lifetime. The frequency and therefore cost of deep cleaning is reduced by applying this intermediate dry foam method.

Technical Data

Tank capacity	11 l
Working width	35 cm
Nominal Consumption	700 W
Dimensions (LxWxH)	710x420x510 mm
Cable length	15 m
Wheel diameter	200 mm
Noise level	59-61 dB(A)
Weight	28 kg
Hand brush coupling	yes
Protection class	I
Approvals	ÖVE
